
EDUCATION

PES Modern College of Engineering
Bachelor of Engineering; CGPA: 7.56

Pune University
2015-2019

SKILL SUMMARY

- Languages: JAVA, SQL
- Framework: Spring boot, Rest Assured, Junit, TestNG, Selenium, BDD cucumber, Splunk
- Tools: Eclipse, STS, IntelliJ, GitHub, SQL developer, Docker, Kubernetes, Jenkins, Insomnia
- Database: Oracle, MYSQL, Postgres, Cassandra
- Cloud: Azure, Kafka, event hub, service bus.

SUMMARY

- 5+ years of experience in Java development with a focus on microservice-based applications using Spring Boot.
- Experienced in API automation testing, implementing robust testing frameworks and methodologies.
- In-depth understanding of Agile methodologies, with a focus on delivering sustainable, optimized code.

Experience

ACCENTURE

March 22 – February 25

Custom Software Engineering Analyst

1. Enterprises Application Backed spring boot micro service developer. (Barclays)
Create Java Spring Boot based microservice, Analyze the requirement write the code, Create the test cases, Deploy the application, Maintain the application. Technology used spring boot, oracle db, splunk, intellij, openshift, Jenkins, git. Worked on PAPI. Started working on React application. Support for hot fixes and defect fixes.
2. Enterprises Application Backed In spring boot micro service. (AT&T)
Implementation of event hub, service bus, Splunk, DB management and Azure cloud management. Application able to handle the upstream transaction and downstream notification. Able to handle the millions of orders per minute from upstream. Save the orders in DB, Provides the downstream notification and event updates.

INFOSYS

November 19 – March 22

Test Engineer

Application Development. (Infosys Internal)

1. Banking API validation Automation Tool Development. Frontend and Backend development. Java based file handling system and multithread application. Working with clients to understand the requirement. API validation and Automation Framework (HSBC, SWIFT payment Gateway) Banking API validation with SWIFT gateway. Automation Framework Development. Bug identification. Communicate with client to understand the Test data and API documentation

2. **API validation and Automation Framework (HSBC, SWIFT payment Gateway)** Banking API validation with SWIFT gateway. Automation Framework Development. Bug identification. Communicate with client to understand the Test data and API documentation.

CERTIFICATIONS

Google Cloud Certified Associate Cloud Engineer
SDET Tag: Agile, DevOps, Java, Selenium certification Infosys Internal.

ACHIEVEMENTS

Insta Award for Tool Development, Rookie of the Quarter Q4FY21, Certificate of Appreciation.
